

APPENDIX A

NOTICE OF VIOLATION

General Services Administration  
Public Building Service  
Washington, D. C. 20407

Docket No. 030-19256  
License No. 08-13066-03

As a result of the inspection conducted on May 15, 1985, and in accordance with the NRC Enforcement Policy (10 CFR 2, Appendix C), the following violations were identified:

- A. 10 CFR 20.201(b) requires that each licensee make such surveys as may be necessary to comply with all sections of Part 20. As defined in 10 CFR 20.201(a), "survey" means an evaluation of the radiation hazards incident to the production, use, release, disposal, or presence of radioactive materials or other sources of radiation under a specific set of conditions.

Contrary to the above, as of May 15, 1985, no surveys (evaluations) were not performed to assure compliance with 10 CFR 20.101. Specifically, the dose to the whole body of employees whose film badges were assigned and returned to the film badge supplier, but were not processed were not evaluated.

This is a Severity Level IV violation (Supplement IV).

- B. Condition 14 of License No. 08-13066-03 requires that sealed sources containing byproduct material be tested for leakage and/or contamination at intervals not to exceed six months.

Contrary to the above, a gauge containing byproduct material was not tested for contamination or leakage for an interval of more than six months.

This is a Severity Level IV violation. (Supplement VI)

Pursuant to the provisions of 10 CFR 2.201, General Service Administrator is hereby required to submit to this office within thirty days of the date of the letter which transmitted this Notice, a written statement or explanation in reply, including: (1) the corrective steps which have been taken and the results achieved; (2) corrective steps which will be taken to avoid further violations; and (3) the date when full compliance will be achieved. Where good cause is shown, consideration will be given to extending this response time.
