U. S. Nuclear Regulatory Commission, Region IV  
Material Radiation Protection Section  
611 Ryan Plaza Drive, Suite 1000  
Arlington, TX 76011

Gentlemen:

Enclosed in duplicate is completed NRC Form 313 "Application for Material License", together with supplemental pages and our Operating and Emergency Procedures Manual. NOW Logging, Perforating Inc. is a new company formed to conduct perforating and well logging services for the oil and gas industry, primarily in northern Oklahoma. As you will note on our letterhead, NOW stands for Northern Oklahoma Wireline.

Mr. Monte McCormick will serve as engineer and radiation handler for our well logging operations. He will also serve as the Radiation Protection Officer for our company. His resume and certificate of training are attached. The enclosed Operating and Emergency Procedures outlines our radiation protection program and contains example forms, facility and bunker sketches, and representative drawings of source assemblies, handling tools, and transport containers for well logging purposes.

We have been assisted in the preparation of this submittal by Keith Moon of Support Consultants and Associates, Inc. I have reviewed the enclosed materials and agree with the statements therein. If you have any questions, please contact Mr. McCormick, or you may contact Mr. Moon, as he is authorized to act on our behalf in the acquisition of this license. Our check in the amount of \$700.00 for the license fee is also enclosed.

Sincerely,

Jim A. Dixon  
Vice President
