Washington, D. C. 20555

Gentlemen:

Subject: Application for renewal of Special Nuclear
Material License SNM-52

Yale University hereby applies for a renewal of SNM-52 in its entirety as amended through June, 1983. The Special Nuclear Materials mentioned in the above license will be used for Research and Development as defined in 10 CFR Part 70.4 (j.). This application is exempt from the filing fee under 10 CFR Part 170.11 Exemptions (a) (4).

Persons using materials mentioned in the above license within Yale University must apply for authorization to, and be approved by, the University Radiation Safety Committee. The current membership of the Committee is included in the supplementary information.

The Health Physics Division which works with the various research groups within the University to assure that the appropriate regulations are complied with, and good practice in the use of radioactive materials is observed, consists of the following:

- (a) Director (Health Physicist)
- (b) two Health Physicists
- (c) five Technicians
- (d) Sr. Administrative Specialist
- (e) Departmental Secretary
- (f) Film Badge Service person

The Health Physics Division reports directly to the University Radiation Safety Committee. Personnel dosimetry is provided through the use of film badges which are processed and reported to us by the R. S. Landauer, Jr. & Company.
