Chairman JACKSON
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Dr. JACKSON,

I am writing to you to express our gratitude for the services of your staff, Mr. ANDRZEJ DROZD who visited our Institute on September 9-13, 1996. During his visit, Mr. DROZD gave lectures on source term calculation and fission product transport under post-accident conditions. The presentation, and the follow-up discussions significantly contributed to our better understanding of the complexity of plant safety evaluation.

We would appreciate very much any assistance you can provide to us in establishing appropriate safety goals for our nuclear power plants.

With our best regards,

WU JIAN MING
Vice-Chairman
Science & Technology Committee
Shanghai Nuclear Engineering Research and Design Institute
