ENVIROCARE OF UTAH, INC.
THE SAFE ALTERNATIVE

January 27, 1997

Mr. Harold LeFevre
Nuclear Regulatory Commission
TWFN, Rm 2C22, M/C 7J9
11545 Rockville Pike
Rockville, MD 20852-2738

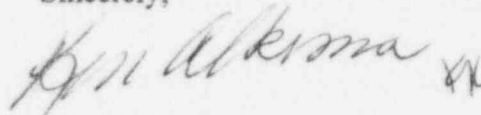

Dear Mr. LeFevre:

Attached is a draft of the technical memorandum on groundwater from Adrian Brown Consultants. As you are aware, we have contracted with Adrian Brown to provide us additional technical expertise on the 11e.(2) groundwater issues.

It is Envirocare's intent to demonstrate to the NRC's satisfaction that all measured values for arsenic and any other constituent are part of background. This draft technical memorandum provides information in support of that position. We look forward to talking to you concerning these issues and plan to provide a final report by March 1, 1997.

Please contact me if you have any questions.

Sincerely,

Kenneth L. Alkema
Director of Government Affairs
