Mr. Robert Lowenstein, Director
Division of Licensing & Regulation
U. S. Atomic Energy Commission
Washington 25, D. C.

Re: Permit No. 29-7400-1

Dear Sir:

The Sludge Density meter which is covered by an Atomic Energy Commission License No. 29-7400-1 to possess Strontium 90 granted to the Middlesex County Sewerage Authority on May 25, 1961 proved not to be suitable for the purpose intended.

This is to notify you that the equipment is being removed and any replacement will not require a permit.

Please advise procedure to cancel the above permit.

Very truly yours,

A. J. Popowski

A. J. Popowski
Executive Director
