Subject: MESSAGE FOR MICHELLE SIME-MOORE

Bob,

I hope that you had a pleasant and safe trip back home after an informative SLO meeting. I thought that your talk was quite though provoking and insightful.

Please inform Michelle that I have been tasked to review Part 19, Licensing and Radiation Safety Requirements for Irradiators, that was sent to Charles Hackney dated September 17, 1996. We are trying to finish the compatibility review by October 23, 1996. I presume that this is early enough for your hearing date of November 20, 1996. If any items come up, please let me know at SNS@NRC.GOV or 301/415-2368.

Steve
