MEMORANDUM FOR: P. Bemis, Acting Director
Division of Reactor Safety

FROM: J. Lankford, Investigation/Allegation Coordinator

SUBJECT: REQUEST FOR ASSISTANCE

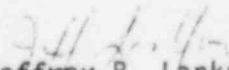

CASE NO: RII-84-A-0143

Reference is made to my memorandum to J. Blake, which provided the results of your review of the alleged's affidavit in this case. The two technical issues identified for followup were identified as:

- 1) Construction activities affecting steam generator feedwater pumps and piping systems related thereto
- 2) Hanger inspection problems

We have received a request from Mr. Charles Barth, Senior Litigation Attorney, ELD, to determine if there are previous inspection reports dealing with these two concerns. Mr. Barth has requested Region II assistance in identifying any such reports. He has also requested this information be provided to him as soon as possible, but no later than the morning of November 7, 1984, as he has a deadline from the ASLB to prepare a response by November 13, 1984.

Your assistance in this matter is appreciated.

CALLED MR. BARTH ON 11/6/84 - INFORMED HIM THAT THERE HAVE BEEN NO INSPECTIONS WHICH SPECIFICALLY ADDRESSED THE FEEDWATER PUMP PIPING PROBLEM. I ALSO INFORMED HIM THAT THE MATERIAL PROBLEMS ASSOCIATED WITH HANGERS WAS THE SUBJECT OF A VIOLATION WRITTEN BY J. YORK IN INSPECTION REPORT NO. 90-400/83-20
