Re: Radiation Safety Procedures for USNRC License No. 34-19089

Dear Mr. Null:

In response to your letter dated December 5, 1995 wherein you requested the opportunity to review the Radiation Safety Procedures (RSPs) that were referenced in our license renewal application dated October 30, 1995, enclosed are the following two additional RSPs:¹

- RSP-014, "Receipt, Handling and Identification of Radioactive Materials"
- RSP-015, "Packaging and Transportation of Radioactive Materials"

These procedures are being submitted to the USNRC as supplemental information only to assist in your review of our application. They are not to be considered part of the application package or incorporated as license conditions. However, your comments on these RSPs, which have been reviewed and approved by the AMS Radiation Safety Committee, are welcome.

Because our renewal application was originally submitted more than thirty (30) days prior to the expiration date of License No. 34-19089-01, AMS assumes the license will remain in effect, under its existing provisions, until final action is taken on this revised application. Since AMS wishes to institute significant changes in our radiation protection program in order to improve its applicability and auditability, your prompt consideration of our revised application would be greatly appreciated. If you have any questions, please contact me at (216) 692-3270.

Sincerely

Robert Meschter, R.S.O.

C. D. Berger, C.H.P. - IEM

¹ RSP-001 and RSP-003 were sent to you previously as part of our October 30, 1995 license renewal application, and RSP-002, RSP-003, RSP-005, RSP-007, RSP-009, RSP-011, RSP-012, RSP-013, RSP-016, and RSP-017 were forwarded to you under separate cover. RSP-006, RSP-008 and RSP-010 are currently undergoing technical and administrative review. As soon as the reviews are complete, the final versions of these RSPs will be forwarded to the USNRC.
