**Re: Radiation Safety Procedures for USNRC License No. 34-19089**

Dear Mr. Null:

In response to your letter dated December 5, 1995 wherein you requested the opportunity to review the Radiation Safety Procedures (RSPs) that were referenced in our license renewal application dated October 30, 1995, enclosed is RSP-006, "Training and Qualifications of Radiation Protection Personnel". With this submission, Advanced Medical Systems, Inc. (AMS) has provided all of the procedures that were referenced our Radiation Protection Program Plan.<sup>1</sup>

With the exception of RSP-001 and RSP-003, these procedures were submitted to you as supplemental information only, to assist in your review of our renewal application. They are not to be considered part of the application package or incorporated as license conditions. However, your comments on these RSPs, which have been reviewed and approved by the AMS Radiation Safety Committee, are welcome.

Because our renewal application was originally submitted more than thirty (30) days prior to the expiration date of License No. 34-19089-01, AMS assumes the license will remain in effect, under its existing provisions, until final action is taken on this revised application. Since AMS wishes to institute significant changes in our radiation protection program in order to improve its applicability and auditability, your prompt consideration of our revised application would be greatly appreciated. If you have any questions, please contact me at (216) 692-3270.

Sincerely

Robert Meschter, R.S.O.
