

November 4, 1996

LICENSEE: Maine Yankee Atomic Power Company

FACILITY: Maine Yankee Atomic Power Station

SUBJECT: CORRECTION TO SUMMARY OF JULY 30, 1996, MEETING WITH
REPRESENTATIVES OF MAINE YANKEE ATOMIC POWER COMPANY

On October 7, 1996, the NRC staff issued a summary of a July 30, 1996, meeting with representatives of Maine Yankee Atomic Power Company. Enclosure 1 of the meeting summary was a transcript of the meeting. The enclosure was missing page 49. Page 49 is enclosed herewith. The staff regrets any inconvenience this may have caused.

1 So again, just to have better understanding
2 about licensing basis and design basis and things of that
3 nature. The legal implications of an SER, basically the
4 hierarchy of regulations and license conditions and the
5 like. And it's my plan to incorporate that particular
6 type of a training module in our continuing training for
7 engineering.

8 This is something I think we just need to keep
9 periodically coming back to and reminding people about the
10 details. And also I found out in time that expectations
11 and interpretations change. And that's a convenient time
12 to update people on new interpretations and new positions.
13 And last, on this slide, licensing procedures are being
14 updated.

15 Many of the things I've talked about before
16 this have been communicated verbally, and I want to make
17 sure that over time we don't lose that information. So
18 the essence of these requirements of all verbal
19 commitments and etc. will be placed in Maine Yankee
20 procedures.

21 MR. RUSSELL: Let me cover an aspect of
22 commitments. I want to make sure that you've considered
23 in your tracking and handling, and it relates to
24 licensing. And in particular, if you submit an
25 application for an amendment or you submit something that
