RE: Advanced Medical Systems, Inc. Application to Amend
USNRC License No. 34-19089-01

Dear Mr. Wright:

Advanced Medical Systems, Inc. (AMS) requests amendment of the referenced license to reflect the following organizational changes in its radiation protection program.

Alternate Radiation Safety Officer

The Alternate Radiation Safety Officer (ARSO) for AMS is Mr. Stephen J. Haddock. Mr. Haddock has an academic degree, management experience, and over five (5) years of experience in the safe use of radioactive materials. He also has specific training in radiation protection issues, including, but not limited to:

- Principles and practices of radiation protection; Radioactivity measurements monitoring techniques, and the use of instruments;
- Mathematics and calculations basic to the use and measurement of radioactivity; biological effects of radiation;
- Safety practices applicable to protection from the radiation, chemical toxicity, and other properties of the radioactive materials in use at AMS facilities;
- Conducting radiological surveys and evaluating results; evaluating radioactive material processing facilities for proper operations from a radiological safety standpoint; and
- Applicable USNRC, USEPA, and OSHA regulations, as well as the terms and conditions of any licenses and permits issued to AMS by these agencies.

As a long-standing employee of AMS with hands-on experience in all current operations, Mr. Haddock is also knowledgeable of the origins of radiation exposures at the facility by location, operation, and job category. A copy of Mr. Haddock's resume is included herein as Attachment I.

481

Mr. Geoffrey Wright, USNRC

July 5, 1996

Mr. Haddock has been given the authority to implement the AMS radiation protection program described in the reference license and in RSP-001, "Radiation Protection Program Plan" in the absence of the RSO. (RSP-001 accompanied our October 31, 1995, license renewal application.) When acting as the RSO, he has the responsibility and authority for terminating any work activities that do or may violate regulatory or AMS requirements for radiological protection.

AMS understands that no amendment fees are required for organizational changes, therefore, none are enclosed. If I can answer any questions or provide you with additional information, please call me at 216/466-8005. Your prompt attention to this amendment is appreciated.

Sincerely,

DAVID CESAR
Vice President and Treasurer

RESUME FOR STEPHEN J. HADDOCK

Education

B.A. (Health), Baldwin-Wallace College (1986)

"Radioactive Material Shipping", ILM (1995)

CSI "40-Hour Radiation Safety Officer Training" (September 16, 1996)

Professional Affiliations

Health Physics Society (application submitted)

Experience and Background

Advanced Medical Systems, Inc. (1991 to present) - Isotope Handler and Radiation Protection Technician. Provides health physics support in all aspects of the facility's operation, including in high radiation areas with accessible dose rates in excess of three (3) R per hour, transfer and handling of radiation sources, equipment maintenance and calibration, packaging and shipping of radioactive materials, radioactive materials inventory, surveillance activities, and procedure implementation.

Coyne-Kungesser - Facility Coordinator. Managed 15 employees, which involved hiring, payroll, termination, and scheduling of personnel as well as marketing functions. Responsible for customer complaints, billing, and deposits. Position included customer contact.

Baldwin-Wallace College - Athletic Trainer. Part-time student athletic trainer with the Athletics Department. Duties included all facets of injury assessment, including emergency procedures, first-aid, including physical therapy and preventative procedures. Assisted doctors with field emergencies and physicals.
