Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Sir:

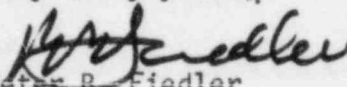

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Technical Specification Change Request No. 129, Rev. 1

GPU Nuclear Corporation, operator of the Oyster Creek Nuclear Generating Station, Provisional Operating License No. DPR-16, requested a change to the Technical Specifications in Technical Specification Change Request (TSCR) No. 129 submitted October 22, 1984. This submittal provides a revision to TSCR 129 and should replace the previous submittal in its entirety.

The original TSCR has been revised as a result of discussions between Jack Donohew of your staff and GPUN BWR Licensing. This revision should add clarity and bring the Technical Specifications into agreement with NUREG-0123, Revision 3 "Standard Technical Specifications for General Electric Boiling Water Reactors".

If you have any questions regarding this matter, please contact Mr. Michael Laggart of my staff at (201)299-2341.

Very truly yours,

Peter B. Fiedler
Vice President and Director
