File No. G9.5

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Denton:

River Bend Station-Unit 1  
Docket No. 50-458

Enclosed is a change to the River Bend Station (RBS) Final Safety Analysis Report (FSAR) that updates Table 2.5-20 to reflect revised design differential settlement ranges. This change makes the FSAR values match the values given in the proposed Technical Specifications. No change to the Technical Specifications is required. Prior to this change, the Technical Specification values were more conservative than those given in FSAR Table 2.5-20.

Sincerely,

*J. E. Booker*
