Re: Radiation Safety Procedures for USNRC License No. 34-19089

Dear Mr. Null:

In your letter dated December 5, 1995 you requested the opportunity to review the Radiation Safety Procedures (RSPs) that were referenced in our license renewal application dated October 30, 1995. Although not referenced therein, enclosed is RSP-020, "Quality Assurance Audits". This procedure is being submitted as supplemental information only, to assist in your review of our renewal application. It is not to be considered part of the application package or incorporated as license conditions. However, your comments on this RSP, which has been reviewed and approved by the AMS Radiation Safety Committee, are welcome.

Because our renewal application was originally submitted more than thirty (30) days prior to the expiration date of License No. 34-19089-01, AMS assumes the license will remain in effect, under its existing provisions, until final action is taken on this revised application. Since AMS wishes to institute significant changes in our radiation protection program in order to improve its applicability and auditability, your prompt consideration of our revised application would be greatly appreciated. If you have any questions, please contact me at (216) 692-3270.

Sincerely

Stephen J. Haddock, R.S.O.
