Gentlemen:

Enclosed is an application to ammend license #20-16890-01 issued to Instru-
mentation Laboratory.

Allied/Instrumentation Laboratory, formerly known as Instrumentation Laboratory,
has recently undergone a redirection in its research program. This requires an
expanded possession limit of the isotopes allowed under the existing license as well
as possession limits for several additional isotopes. Allied/Instrumentation Lab-
oratories will also require the use of its company van for the transportation of
radioactive material between its Andover and Lexington facilities. All such ship-
ments will follow DOT/NRC regulations and the driver will be trained in the safe use
and control of radioactive material.

The enclosed application covers the expanded isotope requirement, laboratory
facilities and control program for the new research program. Please feel free to
contact F.X. Masse on any questions regarding this application.

Regards,

James Hengst
