Duke Power Company
✓ATTN: Mr. H. B. Tucker, Vice President
Nuclear Production Department
422 South Church Street
Charlotte, NC 28242

Gentlemen:

SUBJECT: REPORT NOS. 50-369/85-10 AND 50-370/85-11

On February 7 - July 3, 1985, NRC inspected activities authorized by NRC License Nos. NPF-9 and NPF-17 for your McGuire facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report. The NRC's concerns relative to the inspection findings were discussed by Dr. J. Nelson Grace of this office and Mr. H. B. Tucker of your office, in an Enforcement Conference held at the Region II Office in Atlanta, Georgia on July 3, 1985.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities violated NRC requirements and other activities appeared to deviate from a commitment to the NRC. The violations and deviations, with pertinent references and elements to be included in your response, are presented in the enclosed Notices.

In addition to the need for corrective action regarding these specific violations, we are concerned, as we stated during the Enforcement Conference, about the implementation of your management control systems that permitted their occurrence. Additionally, a particular concern was management's delay of verifying the operability of battery EVCA after being informed of the apparent surveillance and maintenance discrepancies on February 1, 1985. Consequently, in your reply, you should describe in particular those actions taken or planned to improve the effectiveness of your management control system.

Should you have any questions concerning this letter, please contact us.

Sincerely,

ORIGINAL SIGNED BY
JOHN A. OLEKINSKI

J. Nelson Grace
Regional Administrator
