Dear Mr. Rudy:

Thank you for the time you spent with me on September 26. It was most useful for me to understand your perspective on the absorption of the nuclear regulatory function into the Ministry and on the proposed International Nuclear Safety and Environmental Center.

I look forward to working with the Ministry, and the Nuclear Regulatory Administration in particular, on cooperative efforts within the limits of available resources. I am also optimistic that a successful Center can be established.

Sincerely,

Shirley Ann Jackson
