SUBJECT: SUMMARY OF MAY 1, 2020, PUBLIC MEETING WITH  
NUCLEAR ENERGY INSTITUTE REGARDING  
INFORMATIONAL NEEDS DURING TSTF-505 LICENSE  
AMENDMENT REQUEST REVIEWS

On May 1, 2020, the U.S. Nuclear Regulatory Commission (NRC) staff held a public teleconference<sup>1</sup> with representatives from the Nuclear Energy Institute (NEI) and others. The purpose of the meeting was to discuss the information needs encountered by the NRC staff in reviewing license amendment requests to implement a risk-informed completion time program in accordance with Technical Specification Task Force Traveler 505 (TSTF-505), "Provide Risk-Informed Extended Completion Times – RITSTF Initiative 4b." The questions to be discussed were previously made public for a March 2, 2020, public meeting between the NRC and the TSTF.<sup>2</sup>

At the beginning of the meeting, the NRC staff identified that further interaction was needed on requests for additional information (RAIs) 3, 7, 8, 9, and 10.

General mutual understanding was achieved regarding RAIs 3, 7, 8, and 9. Additional discussion was necessary concerning RAI 10. Industry representatives questioned the level of detail NRC would expect to make its decisions on licensee request.

No regulatory decisions were made in the meeting.

Following the discussion, an opportunity was afforded to any other participants who wished to ask questions or make comments. No questions or comments were received from the public.
