

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

February 1, 1996

Release

MEMORANDUM TO: Carlton Stoiber, Director
Office of International Programs

FROM: Shirley Ann Jackson *Shirley Ann Jackson*

SUBJECT: SECY-96-002, CONTINUATION OF THE NRC-FUNDED
POSITION AT THE U.S. MISSION TO THE INTERNATIONAL
ORGANIZATIONS, VIENNA, AUSTRIA

Prior to my vote on SECY-96-002, I would appreciate your response to the following questions:

1. In your view, what are the three most important accomplishments achieved by the current Nuclear Safety Attache in the time that he has served?
2. How are the Nuclear Safety Attache's activities prioritized? Do these reflect the priorities of the Commission, the EDO, or the Director of OIP?
3. Does the Nuclear Safety Attache take direction solely from the Director of OIP, or does the Ambassador to the U.S. Mission also have a role in the management of the individual?
4. Does the Nuclear Safety Attache attend meetings where NRC staff cannot participate, or is he there in addition to staff presence? If so, can this be viewed as a duplication of effort?
5. If the Attache position were not to continue, and OIP was allowed to maintain the FTE, how will it be utilized?
6. Does the Attache assist in any safeguards initiatives, and if not, do you see any need for expansion of the role to include this?
7. Are there any additional responsibilities you would assign to this position if the decision is to retain it?
8. Has the current Attache expressed views on the continuation of the position?
