Region I  
Nuclear Material Section B  
631 Park Avenue  
King of Prussia, PA 19406

Gentlemen,

Enclosed you will find an Application for Material License and proper fee for the use of sealed sources in nonportable gauging devices. This application is a renewal of license number 37-19173-01.

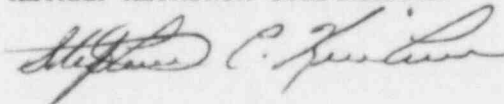

Please be advised that no change has occurred concerning this device since the last license application was filed 5 years ago. It has NOT been used and still remains in storage. Future plans for the gauging device are not known at present. The NRC will be notified when the status of said device changes. In the meantime, a physical inventory will be conducted every 6 months and safety procedures will be enforced according to the conditions of the materials license.

Also, please note that Howmet Aluminum is now Alumax Aluminum Corporation and all correspondence will reflect this change.

If you have any questions please contact me.

Regards,

ALUMAX ALUMINUM CORPORATION
