Mr. John Wills
Radiological Analyst
Ohio Emergency Management Agency
8505 Garfield Road
P.O. Box 480
Mentor, OH 44061

Dear Mr. Wills:

On behalf of the Nuclear Regulatory Commission, I would like to express my gratitude for your consideration in allowing us to locate our Mobile Laboratory in your facility. Following the break-in which occurred at the Advanced Medical Systems (AMS) site, your facility provided our inspectors a safe and convenient location to work. As you know, the mobile laboratory is equipped with a gamma spectroscopy system. Our inspectors used this system to measure the cobalt-60 concentration in the water from AMS after it was processed at that site. This was done in order to check the measurements made at AMS and their contract laboratories. Our job would have been much more difficult without the use of your facility. I hope we did not disrupt your operations during our stay.

Enclosed is the spare key to the entrance of the garage. Again, thank you for your assistance.

Sincerely,

Original Signed By
James L. Caldwell, Deputy Director
Division of Radiation Safety
and Safeguards
