Subject: Implementation of TMI Action Item II.K.3.5, "Automatic Trip of  
Reactor Coolant Pumps" (Generic Letter No. 85-12)

Dear Sir:

Yankee chose to perform a plant-specific analysis for TMI Action Item II.K.3.5. That analysis was submitted to the USNRC in August 1984 [Reference (b)]. The USNRC reviewed this report against Generic Letters 83-10, (a), (b), (c), (d) and (e), and determined that additional information was needed to complete their review [Reference (d)]. Yankee's response to these questions were discussed in a meeting with the USNRC staff on March 13, 1985. Questions not resolved in the meeting or requiring a written response were recently provided to the USNRC [Reference (g)]. Concurrent with these actions, Yankee submitted a schedule for TMI Action Item I.C.1, "The Upgrade of Emergency Operating Procedures" [Reference (c)]. This schedule requires Yankee's emergency operating procedures to be upgraded prior to the startup of Cycle 19. The USNRC concurred with this schedule in July 1985 [Reference (f)].

Page 2

In summary, Yankee has completed TMI Action Item II.K.3.5 and has a USNRC approved schedule for Item I.C.1. Therefore, Yankee has completed all the requirements of this generic letter.

Very truly yours,
