Re: Radiation Safety Procedures for USNRC License No. 34-19089

Dear Mr. Null:

Advanced Medical Systems, Inc. (AMS) is in receipt of your letter dated December 5, 1995 wherein you requested the opportunity to review the Radiation Safety Procedures (RSPs) that were referenced in our license renewal application dated October 30, 1995. In partial compliance with that request, enclosed are the following RSPs:¹

- RSP-002, "Definitions"
- RSP-004, "Radiation Protection Records"
- RSP-005, "ALARA Program"
- RSP-007, "Training in Radiation Protection"
- RSP-009, "Contamination Control"
- RSP-011, "Radiological Areas and Posting"
- RSP-012, "Control of Work"
- RSP-013, "Control of Radioactive Waste"
- RSP-016, "Emergency Response and Notifications"
- RSP-017, "Stop Work Authority"

These procedures are being submitted to the USNRC as supplemental information only to assist in your review of our application. They are not to be considered part of the application package or incorporated as license conditions. However, your comments on these RSPs, which have been reviewed and approved by the AMS Radiation Safety Committee, are welcome.

¹ RSP-001 and RSP-003 were sent to you previously as part of our October 30, 1995 license renewal application. RSP-006, RSP-008, RSP-010, RSP-014, and RSP-015 are currently undergoing technical and administrative review. As soon as the reviews are complete, the final versions of these RSPs will be immediately forwarded to the USNRC.

Because our renewal application was originally submitted more than thirty (30) days prior to the expiration date of License No. 34-19089-01, AMS assumes the license will remain in effect, under its existing provisions, until final action is taken on this revised application. Since AMS wishes to institute significant changes in our radiation protection program in order to improve its applicability and auditability, your prompt consideration of our revised application would be greatly appreciated. If you have any questions, please contact me at (216) 692-3270.

Sincerely
