SUBJECT: NRC INSPECTION REPORT 50-445/97-06, 50-446/97-06
(REQUALIFICATION PROGRAM)

Dear Mr. Terry:

In a telephone conversation on February 4, 1997, Mr. Thomas Meadows made arrangements with Mr. Matt Sunseri, Director, Nuclear Training, for the NRC to inspect the licensed operator requalification program at the Comanche Peak Steam Electric Station. The inspection is planned for the week of April 28, 1997, which coincides with your regularly scheduled requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with 10 CFR 55.59(c), the NRC may request facility licensees to submit their comprehensive requalification written examinations or annual operating tests as necessary to support the NRC's inspection program needs. In order for the NRC to adequately prepare for this inspection, please furnish the documents listed in the enclosure. Mr. Sunseri has been advised of this request and provided with the name and address of the NRC lead inspector assigned to this inspection.

The request for requalification examination material is covered by Office of Management and Budget (OMB) Clearance Number 3150-0101, which expires on April 30, 1997. The estimated average burden is 7.7 hours per response, including gathering, copying and mailing the required material. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Information and Records Management Branch, Mail Stop T-6 F33, Office of Information Resources Management, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; and to the Paperwork Reduction Project (3150-0101), Office of Information and Regulatory Affairs, NEOB-10202, Office of Management and Budget, Washington, D.C. 20503.

If you have any questions regarding this inspection, please contact Mr. John L. Pellet, Chief, Operations Branch, at 817/860-8159 or Mr Thomas R. Meadows at 817/860-8156.

Sincerely,

Thomas P. Gwynn, Director
Division of Reactor Safety
