FORT CALHOUN STATION
TRAINING AND QUALIFICATION PLAN
REVISION 5
CHANGE A

EXPLANATION OF CHANGES

The Fort Calhoun Station (FCS) Training and Qualification Plan (T&QP) Revision 5 was submitted to the Nuclear Regulatory Commission on November 7, 1996, under the provisions of 10 CFR 50.54(p). Review by Region IV determined the T&QP change appeared to be inconsistent with the criteria of 10 CFR 50.54(p). The change was referred to the Office of Nuclear Reactor Regulations.

The apparent inconsistency involved a change to the first sentence of paragraph 1.5 which states "Nuclear Security Officers must pass a physical examination annually." This change substituted Nuclear Security Officer for Nuclear Officer and no other words in the sentence were altered. The reviewer felt by changing Nuclear Officer to Nuclear Security Officer the use of the term "Nuclear Security Officer" could allow for the possibility that an Armed Nuclear Officer would not be required to pass an annual physical examination as required by 10 CFR Part 73, Appendix B.

Although this interpretation is contrary to the intent of Revision 5, in order to clarify our commitment that all armed security personnel and alarm station operators shall pass an annual physical examination, Change A to Revision 5 was initiated. In Change A, the first sentence in the paragraph was changed to read "Armed Nuclear Officers and CAS/SAS Operators must pass a physical examination annually."

1.4 CONTRACT SECURITY PERSONNEL

Prior to assignment to Security Force duties, personnel from a contract security agency are required to meet the suitability, physical, mental, and physical fitness requirements appropriate to their assigned duties, as indicated in this Plan.

1.5 REQUALIFICATION

Armed Nuclear Officers and CAS/SAS operators must pass a physical examination annually. Armed personnel must also meet the vision and hearing requirements specified in Section 1.2.1.B and the physical fitness requirements specified in Section 1.3.

1.6 DOCUMENTATION

The results of suitability, physical, mental and physical fitness qualifications and requalifications are documented. These records are retained at FCS after the document has been completed.

PART TWO

2.0 TRAINING AND QUALIFICATION

This Part outlines the training and qualification program that has been designed to assure that Nuclear Officers are capable of performing their assigned duties during normal and contingency operations. Crucial tasks necessary for implementation of the Site Security and Safeguards Contingency Plans are identified, conditions and standards for each task are specified, and crucial tasks are assigned to the Security Force duty positions that perform them. Crucial tasks associated with firearms training and qualification are listed and defined separately in Part Three, Firearms Training, Qualification and Requalification.

2.1 TRAINING REQUIREMENTS

Prior to assignment on the Security Force, each individual is trained to perform crucial tasks associated with the duty position to which he/she will be assigned. The training program includes an entry level training course for each duty position, a firearms training course, refresher training every 12 months, and on-the-job training to correct observed deficiencies.

2.2 TESTING REQUIREMENTS

To become a Nuclear Officer, an individual must qualify by passing a test in every crucial task performed by a given duty position. To remain a Nuclear Officer, an individual must requalify by passing a test in every crucial task performed by a given duty position. Crucial tasks are identified in Section 2.3 and are matched to duty positions in Section 2.4. To pass a crucial task test, the individual must demonstrate his/her knowledge, skills, and ability to accomplish the task. An

ATTACHMENT B

1.4 CONTRACT SECURITY PERSONNEL

Prior to assignment to Security Force duties, personnel from a contract security agency are required to meet the suitability, physical, mental, and physical fitness requirements appropriate to their assigned duties, as indicated in this Plan.

1.5 REQUALIFICATION

Nuclear Officers must pass a physical examination annually. Armed personnel must also meet the vision and hearing requirements specified in Section 1.2.1.2 and the physical fitness requirements specified in Section 1.3.

1.6 DOCUMENTATION

The results of suitability, physical, mental and physical fitness qualifications and requalifications are documented. These records are retained at FCS after the document has been completed.

DEFINITIONS

The following terms have the definitions indicated for purposes of this Plan. Terms defined in 10CFR73.2 are not repeated here if there is no change to the definition.

1. **CAS Operator** - A Nuclear Officer who operates the security system's Central Alarm Station (CAS) equipment.
2. **Contract Security Agency** - A contractor organization that may provide personnel for the Security Force.
3. **Crucial Task** - An act or series of acts performed by a Security Force member that produces a product or an achievable result crucial to the implementation of the Site Security or Safeguards Contingency Plans.
4. **Designee** - A person or persons authorized to exercise the authority of an incumbent position-holder during his absence or in lieu of the exercise of such authority by the incumbent. The incumbent retains the responsibility for the proper exercise of the authority.
5. **Nuclear Officer** - A generic term for a member of the Security Force. Nuclear Officer as stated in this plan means that an individual may be an Armed Nuclear Security Officer, Nuclear Watch Officer, or any individual trained and assigned to perform a specific security task.
6. **Nuclear Security Officer** - An armed, uniformed member of the Security Force trained and qualified to perform security-related duties, including armed response, at FCS.
7. **Nuclear Watch Officer** - An armed or unarmed individual who is trained and qualified to perform security-related duties at FCS.
8. **SAS Operator** - A Nuclear Officer who operates the security system's Secondary Alarm Station (SAS) equipment.
9. **Shift Security Supervisor** - A member of Security management responsible for coordinating activities within the Security Force and with Station Operations, implementing directives, and reporting problems and discrepancies.
10. **Shift Security Sergeant** - An armed, uniformed member of the Security Force who is assigned appropriate leadership duties and responsibilities to ensure compliance of routine, emergency and contingency procedures. This individual may be assigned to perform other security related duties, which would not affect their ability to respond, and may act in the absence of the Shift Security Supervisor.

1.4 CONTRACT SECURITY PERSONNEL

Prior to assignment to Security Force duties, personnel from a contract security agency are required to meet the suitability, physical, mental, and physical fitness requirements appropriate to their assigned duties, as indicated in this Plan.

1.5 REQUALIFICATION

Nuclear Security Officers must pass a physical examination annually. Armed personnel must also meet the vision and hearing requirements specified in Section 1.2.1.B and the physical fitness requirements specified in Section 1.3.

1.6 DOCUMENTATION

The results of suitability, physical, mental and physical fitness qualifications and requalifications are documented. These records are retained at FCS after the document has been completed.

PART TWO

2.0 TRAINING AND QUALIFICATION

This Part outlines the training and qualification program that has been designed to assure that Nuclear Officers are capable of performing their assigned duties during normal and contingency operations. Crucial tasks necessary for implementation of the Site Security and Safeguards Contingency Plans are identified, conditions and standards for each task are specified, and crucial tasks are assigned to the Security Force duty positions that perform them. Crucial tasks associated with firearms training and qualification are listed and defined separately in Part Three, Firearms Training, Qualification and Requalification.

2.1 TRAINING REQUIREMENTS

Prior to assignment on the Security Force, each individual is trained to perform crucial tasks associated with the duty position to which he/she will be assigned. The training program includes an entry level training course for each duty position, a firearms training course, refresher training every 12 months, and on-the-job training to correct observed deficiencies.

2.2 TESTING REQUIREMENTS

To become a Nuclear Officer, an individual must qualify by passing a test in every crucial task performed by a given duty position. To remain a Nuclear Officer, an individual must requalify by passing a test in every crucial task performed by a given duty position. Crucial tasks are identified in Section 2.3 and are matched to duty positions in Section 2.4. To pass a crucial task test, the individual must demonstrate his/her knowledge, skills, and ability to accomplish the task. An
