Joseph M. Farley Nuclear Plant - Unit 1
Elevated Tubesheet Sleeve Technical Specification Amendment

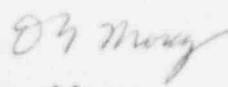

Ladies and Gentlemen:

By letter dated August 23, 1996, Southern Nuclear requested a technical specification amendment for Farley Units 1 and 2 to allow the use of an elevated tubesheet sleeve. An interim amendment was approved for Unit 2 based on an agreement that Southern Nuclear would submit technical specification amendments for Farley Units 1 and 2 for all laser welded sleeves following the completion of the Unit 2 outage.

The laser welded sleeve amendment for Farley Units 1 and 2 was submitted by letter dated January 10, 1997. Consequently, approval of the Unit 1 submittal dated August 23, 1996, is no longer required and is withdrawn.

If there are any questions, please advise.

Respectfully submitted,

Dave Morey
