IN REPLY REFER TO:

United States Nuclear Regulatory Commission
License Management Branch
Division of Fuel Cycle and Material Safety
Regional Office No. 4, 611 Ryan Plaza Drive,
Suite 1000
Arlington, Texas 76011

Dear Ms. Marshall:

Since our license has been renewed up to 1989, Mr. D. D. Monaco died and his work has been taken over by three other people. Two of these people have worked with Mr. Monaco in the past and received safety instruction. The people who are using the Gas Chromatograph are:

1. Robert W. Miller, Supervisory Chemist
2. Andy Newman, Jr., Physical Science Technician
3. Beverly Sanders, Chemist

Besides working with Mr. Monaco, Robert W. Miller has worked in the uranium field for more than thirty years, and has used many different x-ray and counting devices.

Mr. Newman worked with Mr. Monaco and has worked with instrumentation for many years.

Ms. Sanders did not have the opportunity with Mr. Monaco but has been engaged to do the major share of the Chromatograph work. She has worked in other positions and is very familiar with instrumentation.

Any of these three people should be able to answer any questions concerning the operations.

Sincerely,

Robert W. Miller

Supervisory Chemist
