

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

August 26, 1985

Docket No. 50-155
LS05-85-08-031

Mr. David J. Vandewalle
Director, Nuclear Licensing
Consumers Power Company
1945 West Parnall Road
Jackson, Michigan 49201

Dear Mr. Vandewalle:

SUBJECT: RADIOLOGICAL EFFLUENT TECHNICAL SPECIFICATIONS

Re: Big Rock Point Plant

The Commission has issued the enclosed Amendment No. 77 to Facility Operating License No. DPR-6 for the Big Rock Point Plant. This amendment is in response to your application dated January 7, 1985 as revised in your letter of March 14, 1985.

The amendment changes the Technical Specifications and Bases to incorporate Radiological Effluent Technical Specifications (RETS) which meet the requirements of Appendix I to 10 CFR Part 50. The amendment also includes administrative changes which relocate and reformat related Technical Specifications which are not part of the RETS, but were necessary in order to incorporate the RETS into the existing Technical Specifications.

In conjunction with the above amendment, the NRC staff has reviewed the proposed Big Rock Point Offsite Dose Calculation Manual (ODCM) and Process Control Program (PCP) also submitted on January 7, 1985 as revised March 14, 1985. The ODCM and PCP were found to use documented and approved methodology and therefore are acceptable.

A Notice of Consideration of Issuance of Amendment to License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing related to the requested action was published in the Federal Register on June 4, 1985 (50 FR 23546). No public comments or requests for hearing were received.
