Dear Mr. Camper:

In response to your letter received in our office by facsimile on March 1, 1996 the following is submitted:

Page One, IN 89-25, Rev. 1, questions 1,2,3,6, and 8:

1. The new name of licensed organization. If there is no change, the licensee should so state.

Answer: There is no change in that you licensed Innovative Weaponry, Inc. of Nevada and a corporate resolution was done to change the name to 21st Century Technologies, Inc. (Of Nevada). Resolution attached. Therefore the licensee is the same.

As a reference: Mr. Wilson explained on our behalf two weeks ago in your office the steps that took place regarding this name change. Hopefully this information was not confusing but I will try to explain it in writing.

In April of 1995 a merger took place between Innovative Weaponry Inc. Of New Mexico and Innovative Weaponry, Inc. of Nevada which the NRC has documents to this fact. Approximately in July of 1995 the company's CPA explained that a merger would not work because of tax consequences that needed to be carried forward for the public company. Therefore the Innovative Weaponry Inc. of New Mexico company was held as a subsidiary of Innovative Weaponry, Inc. of Nevada and is wholly owned by Innovative Weaponry, Inc. of Nevada. The

officers of Innovative Weaponry, Inc. of New Mexico remain the same. David Gregor is the President and Patricia Wilson is the Executive Vice President. The officers of 21st Century Technologies, Inc. of Nevada (formerly Innovative Weaponry, Inc. of Nevada) are Patricia Wilson, President and David Gregor as Executive Vice President.

2. The new licensee contact and telephone number(s) to facilitate communications.

Answer: The licensee contact is David Gregor and/or Patricia Wilson which has not changed and the telephone numbers and addresses are the same:

337 Eubank NE
Albuquerque, NM 87123
(505) 296-4645
(505) 271-2633 (fax)

3. Any changes in personnel having control over licensed activities (e.g., officers of a corporation) and any changes in personnel named in the license such as radiation safety officer, authorized users, or any other persons identified in previous license applications as responsible for radiation safety or use of licensed material. The licensee should include information concerning the qualifications, training, and responsibilities of new individuals.

Answer: The individuals are the same:

David Gregor - Executive Vice President
Patricia Wilson - President and Safety Officer

There are no changes at this time in personnel that have control over licensed activities. In the annual Directors meeting the above officers were renamed to these positions in the Company. Information on these people should already be in your files.

6. A complete description of any planned changes in organization, location, facility, equipment, or procedures (i.e., changes in operating or emergency procedures).

Answer: You are in receipt of all of our Quality Control/Assurance procedures that are with our new amendment and nothing else has changed at this time.

In June of 1996, we are planning a move of our facilities to a undetermined location at this time because of a zoning problem. Upon determination of our new location the Environmental Department of New Mexico will be notified and a requested change in our license will be requested prior to any move. In addition the NRC will receive the amended license from New Mexico with a request to change our address on our NRC license.

8. Any changes in organization, location, facilities, equipment, procedures, or personnel that would require a license amendment even without the change of ownership.

Answer: None at this time.

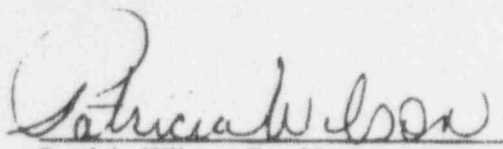

In June of 1996, we are planning a move of our facilities to a undetermined location at this time because of a zoning problem. Upon determination of our new location the Environmental Department of New Mexico will be notified and a requested change in our license will be requested prior to any move. In addition the NRC will receive the amended license from New Mexico with a request to change our address on our NRC license.

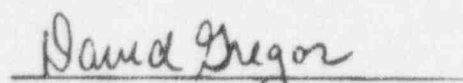

Page Two, Numbers 1 and 2:

1. All personnel will undergo an in-house training seminar which will be designed to familiarize each employee with the contents of the license. This seminar shall include, but not be limited to, the following information; sight configurations that have been approved by the NRC, sight design and construction, minimum and maximum tolerances, quality control and quality assurance procedures, proper labeling and stamping, source installation and inspection. Blueprints of approved sights will be maintained in all areas requiring reference to these sights and dimensions. Patricia Wilson will be responsible for controls and procedures that will be used to verify the products are authorized by the license.
2. With the above procedures in place, all personnel will be able to identify any sight or configuration that does not meet the licensing requirement. If a sight does not conform to the requirement, 21st Century Technologies, Inc. will immediately request an amendment and will not manufacture until the amendment is approved by the NRC. David Gregor is the person responsible to ensure compliance with this requirement.

The above responses are in answer to your letter and we hope meet with your approval. If you have any questions regarding the same, please notify us immediately. Thank you for your help in this matter.

Sincerely,

Patricia Wilson, President

David Gregor, Exec. Vice President
