Mr. D. R. Gipson
Senior Vice President
Nuclear Generation
The Detroit Edison Company
6400 North Dixie Highway
Newport, MI 48166

SUBJECT: NRC RADIATION PROTECTION INSPECTION REPORT NO. 50-341/96011
(DRS)

Dear Mr. Gipson:

On October 11, 1996, the NRC completed an inspection at your Enrico Fermi, Unit 2 facility. The enclosed report presents the results of that inspection.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations of activities, and interviews with personnel.

Overall, the implementation of radiological controls for the RF05 was effective in maintaining a reasonable collective dose for the work accomplished. However, the pre-planning for the control rod position indicating probe modification task significantly underestimated the work scope and the dose expenditure for the scaffolding and cable installation phases. In addition, the NRC identified evidence of eating and drinking in the Radiologically Restricted Area. This independent observation was a confirmation of two occurrences that your staff had previously identified. No violations of NRC requirements or open items were identified.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room (PDR).
