Dear Mr. Randazza:

The Commission has issued the enclosed Amendment No. 84 to Facility Operating License No. DPR-36 for the Maine Yankee Atomic Power Station. This amendment consists of changes to the Technical Specifications (TS) in response to your application dated March 5, 1985 and supplemented June 11, 1985 and modified June 20, 1985.

These changes to Technical Specifications reflect your changes to require more extensive inspection of steam generator tubes in critical areas. Normal random sampling inspection of tubes will be done on other areas of the steam generator.

We have reviewed your proposed Technical Specification changes which would enable you to perform the inspection of steam generator tubes as described and have found these changes are acceptable.

A copy of the Safety Evaluation is also enclosed. The notice of issuance will be included in the Commission's next regular bi-weekly Federal Register notice.

Sincerely,

/S/

Patrick M. Sears, Project Manager
Operating Reactors Branch #3
Division of Licensing
