B16014

Re: 10CFR 50.73(a)(2)(ii)(B)

U. S. Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555

This letter forwards Licensee Event Report 96-026-02, documenting a condition that was determined at Millstone Unit No. 3 on July 30, 1996. This LER was initially submitted pursuant to 10CFR50.73(a)(2)(ii)(B). The License Event Report (LER) supplement, submitted on October 11, 1996, stated that a detailed analysis was performed to determine the maximum system flow rate. A subsequent document verification determined that at the time the LER was submitted the calculations had been completed but had not been reviewed and approved. The calculations were reviewed and approved by management on October 21, 1996.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY

M. H. Brothers
Unit Director
Millstone Unit No. 3
