Honorable Herbert B. Loper
Chairman, Military Liaison Committee
to the Atomic Energy Commission

Subject: Request for Study on Hazards Associated with
the Operation of Nuclear Powered Aircraft

Dear General Loper:

This refers to your memorandum of November 26, 1956 and subsequent discussion between our staffs concerning review of the hazards problems involved in locating a runway at the National Reactor Testing Station in Idaho.

We shall be glad to make the necessary arrangements for Commission review of this matter with the assistance of our Advisory Committee on Reactor Safeguards.

If you will send us relevant hazard information which the Department has developed on this matter, we will try to arrange for an early review of the problems.

Sincerely yours,

DISPATCHED
