Mr. H. R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. NUCLEAR REGULATORY COMMISSION
Washington, D. C. 20555

Attention: Mr. Edward Butcher, Acting Chief
Operator Reactors, Branch No. 3

Gentlemen:

DOCKET NOS. 50-266 AND 50-301
RESOLUTION OF TMI ACTION ITEM II.K.3.30
SMALL BREAK LOCA ANALYSIS METHODS
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

Your letter dated June 26, 1985 transmitted the Safety Evaluation for TMI Action Item II.K.3.30 concerning small break LOCA analysis for Westinghouse NSSS designs and requested that Licensee notify the NRC if the NOTRUMP code will be used in the small break LOCA analysis for their plants. This letter confirms the fact that Wisconsin Electric Power Company is a member of the Westinghouse Owner's Group and that NOTRUMP will be used in the small break LOCA analysis for the Point Beach Nuclear Plant.

In accordance with your June 26 letter, TMI Action Item II.K.3.30 is, therefore, considered complete for the Point Beach Nuclear Plant, Units 1 and 2. As further directed in your letter, the analysis for the Point Beach Nuclear Plant will be submitted before June 26, 1986.

Very truly yours,

Vice President-Nuclear Power

C. W. Fay
