Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Ms. E. G. Adensam, Chief
Licensing Branch No. 4

Subject: McGuire Nuclear Station
Docket Nos. 50-369 and 50-370
Technical Specification Changes for McGuire Nuclear Station
Turbine Overspeed Protection

Attached are proposed license amendments to Facility Operating Licenses NPF-9 and NPF-17 for McGuire Nuclear Station - Units 1 and 2 respectively. The proposed changes involve deleting the turbine valve testing requirements in Technical Specification 3.3.4. A Turbine Overspeed Reliability Assurance Program has been implemented which eliminates the need for routine turbine valve testing as described in technical specifications.

Attachment I contains the proposed Technical Specification changes. Attachment II provides a technical Justification and Safety Analysis in support of the proposed changes. Attachment III provides an analysis conforming to the standards contained in 10CFR50.92 as required by 10CFR50.91. This analysis concluded that the proposed amendments would not involve any significant hazards considerations.

This request involves one application for amendment to the McGuire's Technical Specifications. Accordingly, pursuant to 10CFR170.21, a check for \$150.00 is enclosed.

Please feel free to contact us if you require any additional information.

Very truly yours,

Hal B. Tucker
