Gentlemen:

SUBJECT: In the Matter of
Application of Texas Utilities
Generating Company, et al. for
An Operating License for
Comanche Peak Steam Electric Station
Units #1 and #2 (CPSES)
Docket Nos. 50-445 and 50-446 *OL*
NRC Staff's 8/20/85 Board Notification -
Staff's Determination of Applicants'
Potential Material False Statement on
U-Bolt Sample (Board Notification No. 85-077)

CASE has just received subject letter from the NRC Staff to the Commissioners.

We respectfully request hearings on the matter of the Applicants' statement on the U-bolt sample, which CASE considers to be a material false statement. CASE does not consider that the unsworn statements provided to the Staff by Applicants, without benefit of cross-examination by CASE, is sufficient grounds for the Board to make the determination that Applicants' statement was not a material false statement.

We believe that CASE's previous pleadings have provided sufficient information to clearly show that there is a genuine issue of fact which is in controversy.

In the alternative, should the Board believe that it already has sufficient information to determine that Applicants' statement does constitute a material false statement (in line with the Board's 6/29/84 Memorandum and Order (Written-Filing Decisions)), the Board should now so rule.

Respectfully submitted,

CASE (Citizens Association for Sound Energy)
