Division of Radiation Safety and Safeguards

RE: Inspection report #85-01 and
Notice of Violation

Dear Mr. Stohr:

We are in receipt of above inspection report and violation, dated June 20, 1985, and am replying herewith, as requested, a written reply.

We were not aware of watches coming in containing Promethium-147, until notified by Mr. Lee A. Franklin, Radiation Specialist, that 2 models of watches did in fact contain this radioactive substance, as explained by Mr. Franklin to our Manager, Mr. Evaristo Bulnes.

Upon advisement of this violation a verbal request was made to receive an application for an "Exempt Distribution License" so that we would conform to the law and asked that it be included along with the violation. To date, we have yet to receive this application.

On June 27, 1985, Mr. Bulnes, not being able to contact Mr. Franklin, contacted a Mr. John Hickey, Washington D.C., to again request an application, and advising Mr. Hickey that our company would be closed for vacation July 1, thru July 15, 1985.

We expect to be in full compliance as soon as we receive an application, and request a license.

Very truly yours,

WORLD TIME CORPORATION OF AMERICA
