Also concurrently issued on August 8, 1985 were (1) an exemption from the requirements of 10 C.F.R. 50, Appendix A, General Design Criteria 34 with respect to the residual heat removal system, and (2) an exemption from the requirements of 10 C.F.R. 50, Appendix A, General Design Criteria 37 with respect to the testing of the emergency core cooling system.

Pursuant to an Order of the Commission, dated May 12, 1980, this Licensing Board has been designated to conduct the proceeding with respect to the proposed formal license amendment incorporating the Technical Specifications proposed in the February 11, 1980 Order. In order to conform the proposed Technical Specifications with the actions taken by the Director in the attached Amendment of Order, the NRC staff hereby moves that the proposed Technical Specifications be formally modified to conform to the Amendment of Order subject to the authority which 10 C.F.R. § 2.717(b) explicitly preserves in the presiding officer for purposes of this proceeding. Formal amendment of the license will, of course, await the outcome of the prospective hearing.
