SUBJECT: January 1997 Monthly Operating Report (MOR)

Enclosed please find the January 1997 MOR for Fort Calhoun Station (FCS) Unit No. 1 as required by FCS Technical Specification 5.9.1. Also enclosed is a revised Operating Data Report for December 1996. Item 23 (Unit Forced Outage Rate) was revised to account for a manual turbine trip that occurred on December 31, 1996. As reported in Reference 2, the turbine was tripped to allow repairs on a non-isolatable steam leak on a drain line to the condenser.
