July 25, 1996

Attention Glenda Jackson

N D E Services Inc. has not had in our possession any radioactive material or performed any physical work since Sept. 15, 1995 at which time our camera and radioactive source were sold due to lack of work and resignation of our R S O. The camera and radioactive source were sold to another N R C. Licensed company. The license would have been terminated at that time however N D E Services was approached by another company engaged in radiography about purchasing our company and radioactive material license. Pursuant to N R C regulations a request to sell the license along with supporting documents was prepared and submitted to region IV for consideration. Several revisions of the original proposal were required prior to a review for consideration of sale being initiated. Finally on May 8, 1996 N D E Services was notified that the offer of the purposed buyer was being withdrawn. Please find attached supporting documents for the above statements.

At this time we would like to cancel our Q A plan Certificate number 0792. Since N D E Services was closed due to lack of work and financial losses, please consider a waiver of the license fee's for Radioactive Material License number 11-29082-01 and Q A Plan number 0792 based on the business closure date of Sept 15, 1995. Please contact me if I can be of any further assistance in resolving this matter.

Very truly yours

*Kelly Thompson*
