SUBJECT: Technical Specification Table 3.3-11, New List of Fire Detection Instruments

REFERENCE: Letter from Mr. A. E. Lundvall, Jr., to Mr. J. R. Miller, dated April 26, 1985.

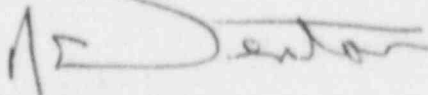

The referenced letter requests an amendment to the Unit 1 & 2 Technical Specifications Table 3.3-11, Fire Detection Instruments. The amendment was submitted to provide additional clarification and reflect physical modifications. Attached is a supplement to that request which also provides additional clarification.

The attachment is a proposed change to the Unit 1 and 2 Technical Specification Table 3.3-11. This change is requested to make the order of instrument locations consistent with the FSAR and to make the table easier to use. The current order of instrument locations has no known basis. The proposed order is sequentially increasing by room number or elevations.

The previous significant hazards considerations are still valid since no detectors have been added or deleted; only the order in which they are listed in the Technical Specifications and the proper location identifiers have been changed.

Should you have any questions regarding this matter, please do not hesitate to contact us.

Very truly yours,

R. E. Denton
General Supervisor -
Training & Technical Services
