Docket No. 030-32721  
License No. 37-28744-01

During an NRC inspection conducted on October 21 and November 13, 1996, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," (Enforcement Policy), NUREG 1600, the violation is listed below:

License Condition 14 of NRC License No. 37-28744-01 requires that a physical inventory be conducted every six months to account for all sealed sources and devices containing licensed material received and possessed.

Contrary to the above, as of October 21, 1996, the required physical inventory to account for all devices containing licensed material was not being conducted every six months. Specifically, the last inventory was conducted on September 5, 1995, a time interval greater than six months.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, Professional Inspection and Testing Service, Inc. is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, with a copy to the Regional Administrator, Region I, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.
