

AUG 27 1985

Mr. D. L. Farrar
Director of Nuclear Licensing
Commonwealth Edison Company
Post Office Box 767
Chicago, Illinois 60690

Dear Mr. Farrar:

SUBJECT: REQUEST OF AMENDMENTS THAT ARE IMPLEMENTED IN THE FUTURE FOR
LA SALLE UNIT 2

We note that in your August 23, 1985 letter requesting amendments for La Salle Units 1 and 2, you requested implementation of these changes for the first refueling outage for each respective unit. The first refueling outage for Unit 2 is projected sometime in 1987. As was indicated to your staff (Mr. Massin), a proposed amendment should not be left pending on a docket for a long time before implementation. This guidance was provided to your staff at the time you submitted the proposed amendments to incorporate the instruments for the suppression pool water level and water temperature with the remote shutdown monitoring instrumentation, dated April 18, 1985.

We, therefore, request that you amend your August 23rd request to only reflect the change for Unit 1; and at about the time for the the Unit 2 refueling outage, this request should be submitted for Unit 2. We also request that this approach be followed for the remote shutdown instrumentation and for all future proposed changes that affect both Units of the La Salle plant.

Sincerely,

~~Original signed by~~

Walter R. Butler, Chief
Licensing Branch No. 2
Division of Licensing
