

August 26, 1985

Docket No. 50-285

Mr. R. L. Andrews
Division Manager - Nuclear Production
Omaha Public Power District
1623 Harney Street
Omaha, Nebraska 68102

Dear Mr. Andrews:

SUBJECT: CORE RELOAD METHODOLOGY CHANGES FOR CYCLE 10

By letter dated June 13, 1985, you submitted core reload methodology changes for the Fort Calhoun Station, Unit No. 1. We have reviewed the changes and find them acceptable for referencing in reload applications. Our acceptance is conditioned upon our review and approval of the validation of the conversion of the CECOR program from the CDC mainframe computer to the ERF minicomputer. This has been discussed and agreed to by your staff. We request that you provide us your schedule for this work when you submit the Cycle 10 technical specification changes in September 1985.

Our safety evaluation is enclosed.

Sincerely,

/S/

Edward J. Butcher, Acting Chief
Operating Reactors Branch No. 3
Division of Licensing

Enclosure:
As stated
