Subject: Transfer of Specific License to General License  
License No. 37-19991-01

Dear Mr. Costello:

In response to your letter to Mr. Clark Harrison of October 2, 1996, we have one correction to note. Mr. Thomas DiMuzio, rather than Anthony Materkowski, serves as our contractor for the required servicing of our nuclear devices. Mr. DiMuzio was previously employed at CQ Inc., and is listed on our current NRC license as an authorized person to supervise and service these devices.

We are currently exchanging information with the manufacturers of our nuclear gauges to determine that these devices do not have to remain under a specific license. Once that is confirmed, we will then submit the request to terminate our NRC specific license using NRC Form 314, "Certificate of Disposition of Materials". Please note however that the manufacturer of the majority of our gauges--Kay-Ray/Sensall--has informed us that the approval to change license status rests with the NRC or state agency; based on this information, it appears that we will have to have NRC's approval before the manufacturer converts our gauges to a general license (if this is not correct, please notify us).

Sincerely,

Glenn A. Shirey  
Project Manager
