Docket No. 50-454

Docket No. 50-455

MEMORANDUM FOR: Hugh L. Thompson, Jr., Director, Division of Licensing, NRR  
FROM: C. E. Norelius, Director, Division of Reactor Projects, RIII  
SUBJECT: LICENSING ACTIONS ASSIGNED TO REGION III FOR THE BYRON FACILITIES

In your memo of July 26, 1985 you requested Region III assistance in conducting a safety evaluation of two actions yet to be submitted for the Byron Station. We have reviewed the request and will accept TAC No. 57077, Relocation of Control for NIS, when it is submitted; however, we decline TAC No. 57076, Iodine/Particulate Sampling. Although this issue was identified by Region III, it is an extremely involved technical and generic issue which the Meteorology and Effluent Treatment Branch has already requested your contractor, Battelle Pacific Northwest Laboratory, to review.

This matter has been discussed with NRR Project Manager, L. Oshan.

If you have any questions concerning this matter, please call R. Greger (FTS 388-5644).

C. E. Norelius, Director
