Office of Nuclear Reactor Regulation
Attn: John F. Stolz, Chief
Operating Reactors Branch No. 4
Washington, D.C. 20555

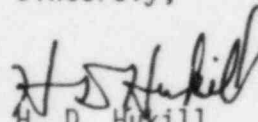

Dear Mr. Stolz:

Three Mile Island Nuclear Station Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Emergency Operating Procedures (EOP) Upgrade Program
Response to SER Questions (NUREG 0737, Item I.C.1)

Our letter of April 4, 1985 stated that a response to Questions 12 and 13 of the Safety Evaluation Report (SER) for TMI-1's Plant Specific ATOG Procedures Generation Package would be delayed until August, 1985. This delay was necessary in order to use the results of the steam generator tube rupture analysis being prepared by the Electric Power Research Institute (EPRI).

EPRI is behind schedule and is not expected to issue their report before the end of this year. GPUN will provide a response to the affected SER questions within one month after receipt of the EPRI report.

Sincerely,

H. D. Hukill
Director, TMI-1
