MEMORANDUM

TO FILE: Uranerz Ruth ISL, R & D 9
FROM: Jim Finley, Hydrologist *JF*
DATE: July 25, 1985
SUBJECT: Amendment to Finley Memo Dated June 25, 1985
CHECKED BY: *WAK*

A. Introduction

The June 25, 1985 memor of Finley clarified three items concerning the Uranerz Ruth ISL project (R & D 9). Poor word choice has led to further misinterpretations and this memo will rectify the problem.

B. Discussion

Item two of the June 25th memo discusses the stabilization period. The second sentence in the paragraph states that Uranerz agreed to continue the stabilization period for twelve months. Uranerz's agreement was only in response to a request made by DEQ/LQD at the December 7, 1984 meeting. Therefore, the second sentence is amended to read, "...stabilization began in January, 1985 and will continue for, as requested by DEQ/LQD, 12 months (January 1986)".

C. Conclusion and Recommendation

This memo represents an amendment of the June 25, 1985 and should indicate that the extension of the stabilization period was a formal request made of Uranerz by DEQ/LQD.
