Re: Docket No. 40-8084
Source Material License No. SUA-1119

Re-Numbering of License Conditions
and Paperwork

Dear Mr. Pettengill:

Although it may be convenient to have our License Conditions summarized and brought up-to-date after every license amendment, it does present a problem for Rio Algom because of our filing system. For instance, License Amendment No. 3 deleted License Condition No. 44 and all subsequent condition numbers were changed. Consequently, when we are discussing License Condition No. 52 we are now talking about reclamation plans rather than environmental monitoring programs--and this is only the start. It could become very confusing. A simple solution would be to retain the dropped license condition and mark it "44. Deleted". And besides, it would eliminate an awful lot of excess paper.

I don't suppose a fee is required for this small change! If you have any questions--please call.

Yours sincerely,

R. S. Pattison
Plant Superintendent
